App Control

View what's happening around your house through the app.
Easy live stream and video playback.

Two-way Audio

Video Playback

Universal Usage

Remote Control

Multi-user Sharing

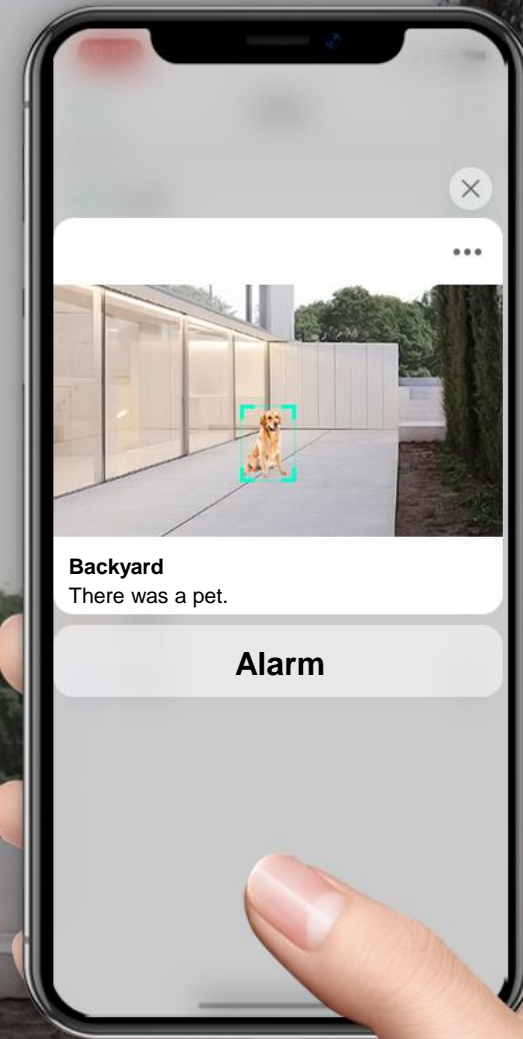

Activity Zone

Accurately draw customized activity zones in the mobile app.
Irrelevant information outside the area would be filtered.
The key area, the key focus.

PIR sensing and triggering, with the help of cloud-based intelligence, are more than just a little bit smarter.

PIR sensing technology + cloud image analysis

PIR triggers the camera, and real-time analysis is done in the cloud and notifications are pushed to the app instantly.

Advanced AI technology. The ability to think makes it different.

Object recognition and behavior analysis.

AI recognition and analysis algorithms intelligently distinguish humans, vehicles, pets with detailed analysis results of passing, staying or leaving, etc.

Notifications are pushed to the app instantly, keeping you informed of what's happening wherever you are.

Human Recognition

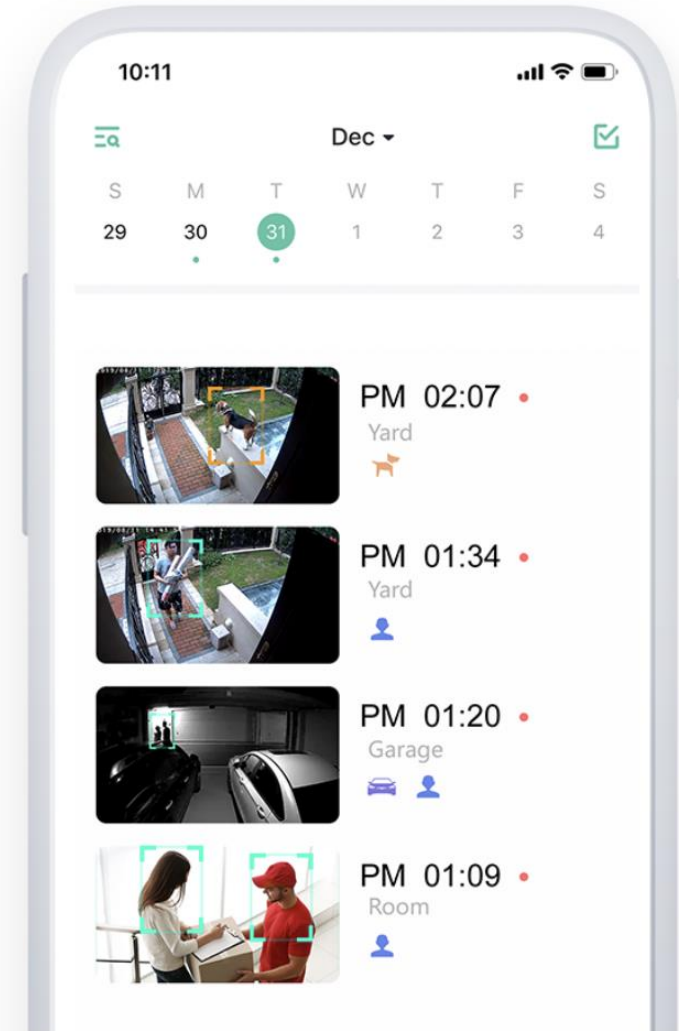

Pet Identification

Vehicle Identification

Parcel Inspection

Smart Notification

Set targeted category in the app, and the cloud AI system will only push notifications when the targets are detected. No more redundant pushes.

Push activities of humans

Push activities of pets

Package deliver notification

Vehicle parking alert

Two-way audio for live communication.

With the built-in waterproof and dustproof microphone and Hi-Fi speaker, you can warn remotely to stop the loss in case of an emergency. For family and friends, live chat to experience intimate interactions, regardless of time and location.

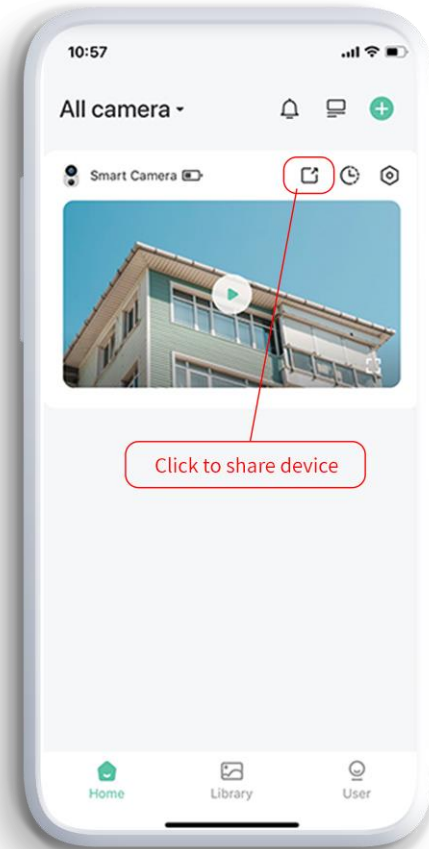

Easy to share access with family and friends.

Access can be shared through the mobile app.
Family and friends can scan the code to get camera access fast and easily.

Camera Sharing

Scan Code for Sharing

Alternative Methods of Storage

Cloud Storage

Up to 60 days of cloud storage*. Intelligent backup to prevent lost.

Local Storage

Micro-SD card storage up to 128 GB, recording without network.

*Some cloud storage and AI services require additional fees. To find out more information about this, please refer to the app.
